FIVERR OFFICIAL PORTFOLIO

Custom Discord Bot Architecture

Python (discord.py) • Persistent Databases • 24/7 Cloud Automation

Simon Rizzus
Python Discord Bot Developer

Core Engineering Capabilities

Interactive Slash Commands & Modals

Native Discord slash commands (`/command`), responsive interactive buttons, select dropdowns, and popup modal forms for secure user data entry.

Relational Database Architecture

Persistent `SQLite` & `PostgreSQL` backends with relational schema design, transactions, automated backups, and instant query execution.

Security & Role Permissions

Granular access control enforcing server roles, staff-only restrictions, input validation, and protection against unauthorized executions.

Audit Logs & Automated Channels

Comprehensive transaction and action logging directed to dedicated staff channels with rich Discord embeds and precise timestamp tracking.

Featured Project: EMS Treasury & Fund Tracking Bot

High-Precision Financial & Faction Management System

A specialized bot engineered for roleplay factions (EMS/Police) and private organizations requiring tamper-proof treasury tracking and staff logs.

- ✓ Real-time balance check & automated calculations
- ✓ Full SQLite ledger history with timestamping
- ✓ Embed UI with intuitive action buttons
- ✓ Role-protected deposit & withdrawal workflows
- ✓ Automatic database export & recovery backups
- ✓ Automated staff notifications & audit channel

Technical Stack & Standards

Frameworks & Runtime

`Python 3.10+` , `discord.py` , `asyncio` event loops for high-concurrency response times.

Deployment & Hosting

Production deployment using `systemd` , `Docker` , or cloud VPS for uninterrupted 24/7 uptime.

PACKAGES & DELIVERY GUIDE

Service Tiers & Workflow

Transparent pricing, structured delivery milestones, and lifetime code ownership

Fiverr Seller Portfolio
Custom Orders Welcome

Available Service Packages

Package	Ideal For	Key Inclusions	Delivery
Starter Bot ($20)	Communities & streamers needing quick tools	Up to 4 custom slash commands, interactive embeds, simple role assignment or welcome greeting.	2 Days
Database & Management ($60)	Economy, factions, teams, tracking systems	Full SQLite database, fund/economy tracking, modal popups, interactive buttons, role permissions.	4 Days
Full Custom + VPS ($120)	Enterprise, FiveM servers, complete automation	Complete multi-system bot, database, audit logs, backup routines, and 24/7 Linux VPS setup.	6 Days

Development & Delivery Lifecycle

1. **Requirement Spec**
   We review your desired commands, server roles, and specific needs.
2. **Coding & DB**
   Clean, asynchronous Python development and database architecture.
3. **Live Testing**
   Hands-on testing on a private test server to verify every command.
4. **Handover / VPS**
   Delivery of full source code, setup guide, and 24/7 VPS deployment.

Buyer Guarantees

100% Full Source Code

You receive the uncompiled, clean, fully commented Python codebase. No vendor lock-in, ever.

Step-by-Step Setup Guide

Includes an easy-to-follow guide to create your Discord token, invite the bot, and start it anywhere.
